smart cities
meeting point

TARRAGONA9SEP12

Welcome to the first edition of the Smart Cities Meeting Point, which will be held in Tarragona the 9th September 2012.

The Smart Cities Meeting Point is one of the activities in the Multi-Twinning Program 2012 Tarragona, a twinning between 5 cities in different European countries (Amsterdam - Netherlands, Brussels - Belgium, Iasi - Romania, Stuttgart - Germany and Tarragona - Spain), which this year 2012 will be held in Tarragona from 8th to 11th September.

This event is a starting point for the 5 cities taking part in the twinning program in order to discuss the key issues and address the main challenges in the cities development, aiming to improve their sustainability and quality of life of their citizens.

In this meeting point participants are expected to exchange own knowledge and experiences, be aware of the latest trends and solutions, built-up connections and plan future actions together.

The city of Tarragona provides a perfect location to hold this event. In one hand, in 2000 Tarragona was awarded as World Heritage by UNESCO and, on the other hand, the city is already implementing smart solutions in its developing projects. When these two features are taken together, its union perfectly merges a splendid past with a future full of possibilities and opportunities both for its inhabitants as well as for all the economical agents involved with Tarragona.

For all the above mentioned reasons, it is a pleasure for us to welcome you to the first Smart Cities Meeting Point between Amsterdam, Brussels, Iasi, Stuttgart and Tarragona.

Yours faithfully,

Oscar Hijosa
Director Smart Cities Meeting Point

who?

City officials from Amsterdam, Brussels, Iasi, Stuttgart and Tarragona
